Information is Power

- Although oxygen Therapies have been quietly in use for more than one hundred years, the general public is relatively unaware of them.
- I am here to bring light to some of the benefits of ozone and oxygen supplementation.

Our Changing World

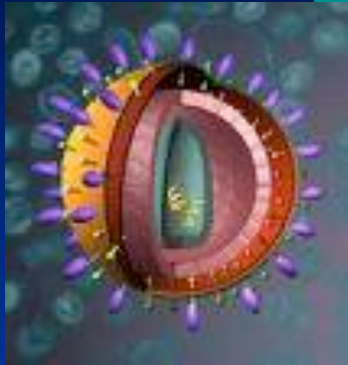

- According to Ed McCabe, best selling author of “*Flood Your Body with Oxygen*” atmospheric oxygen content is 30% or as low as 9% in urban areas. The human species evolved in an environment of 38-50%

Cell Energy Production

- The human species has less oxygen around them than they were designed to run on
- The mitochondria of the cell needs a good supply of oxygen to efficiently burn food and generate energy
- In the absence of adequate oxygen, the cells ferment food for energy and become anaerobic

Most Disease is Anaerobic

- According to Ed McCabe, “almost every virus, bacteria, fungi, mycoplasma, parasite, and other pathogens found in all diseases, including HIV, arthritis, heart disease, cancer, chronic fatigue, epstein-barr, candida, and every other disease you can name are the same as all other primitive lower life forms.”
- Oxygen disturbs the life cycles of things that evolved under low oxygen conditions
- Normal healthy cells make a self-protective antioxidant coating

Ozone in Nature

- Ozone is O_3
- Ozone is created by the sun's UV rays reacting with oxygen
- Ozone falls to earth in rain water cleaning our environment. It becomes H_2O_2 (peroxide), enriching plant roots with extra oxygen
- It is ozone's singlet oxygen that bonds with pathogens and pollution
- The highly active oxygen breaks apart the hydrogen bonds holding together disease, while leaving healthy cells alone

The Ozone Steam Spa

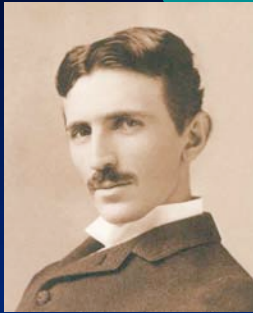

- The Healthy Transformation Ozone Steam Spa
- The Ozone Steam Spa is designed to oxygenate your body

Used around the World

- In Germany 50,000 practitioners gave 384,000 patients 5,579,238 applications of ozone in 2006
- The side effect rate was .000005 per application
- Due to pressure from the FDA and AMA the use of medical grade ozone in the US is strictly prohibited by doctors and hospitals

Ozone for Home Use

- Cold Plasma Ozone Generators are available for home use
- The Cold Plasma Generator was invented by Nicola Tesla
- It uses pure oxygen to create O₃
- There are many uses for ozone including medical applications, water and air purification, and ozonating oils

Healthy Transformation

- 3500 Model
- Cold Plasma Ozone Generator
